

geometry (GeometryType)

b2boptic → items → item → pair → lens → geometry

diameter	
type	Diameter
occurs	1
description	dimension of the lens
decentration	
type	Decentration
occurs	0..1
description	decentration of the lens
waveFrontOptimisation	
type	boolean
occurs	0..1
default	false

waveFrontOptimisation	
description	optimize the lens with the wavefront data
thickness	
type	float
unity	mm
occurs	0..n, not together with thicknessReductionThin
description	the desired thickness of the lens at one or more points
reference (attribute of thickness)	
type	ThicknessReferences
use	required
description	the place of the thickness value
thicknessReduction	
type	boolean
occurs	0..1, not together with thicknessReductionThin
description	thickness reduction of edge and center (e.g. Essilor: Precal; Hoya: METS; Rodenstock: MDM; Zeiss: Optima)
reference (attribute of thicknessReduction)	
type	ThicknessReductionReferences
use	required
description	thickness reduction based on frame shape or raw lens
thicknessReductionThin	
type	boolean
occurs	0..1, not together with thickness or thicknessReduction
default	false
description	the lens should be as thin as possible
ISNEWLO010601 thinningPrism	
type	ThinningPrism
occurs	0..1
description	prism to reduce the thickness
curve	
type	Curve
occurs	0..1
description	lens curve
inset	
type	float
unity	mm
occurs	0..1
description	Horizontal offset from the nasal distance reference point due to the near reference point by the akkomotation in near vision.
upset	
type	float
unity	mm
occurs	0..1
description	Vertical distance from the distance reference point to the top of the near zone (only for multifocal lenses)

designType	
type	string (enum)
occurs	0..1
description	type of lens design
values	description
A	different for each lens manufacturer
B	different for each lens manufacturer
C	different for each lens manufacturer
progressionLength	
type	float
unity	mm
occurs	0..1 (not together with progression(Far/Middle/Near)VisionShiftDistance)
description	for progressive lenses with variable length of progressionzone
progressionFarVisionShiftDistance	
type	float
unity	mm
occurs	0..1 (not together with progressionLength; progressionNearVisionShiftDistance is required)
description	Far Vision Vertical Shift distance Bz to Bf
progressionNearVisionShiftDistance	
type	float
unity	mm
occurs	0..1 (not together with progressionLength)
description	Near Vision Vertical Shift distance Bz to Bn
progressionMiddleVisionShiftDistance	
type	float
unity	mm
occurs	0..1 (not together with progressionLength; progressionNearVisionShiftDistance is required)
description	Middle Vision Vertical Shift distance
progressionZoneCalculationType	
type	string
occurs	0..1
description	Type of calculation of the progression zone length
